Connect your financials, sales, service and operations

Manage your financials

Make informed decisions

Connect data across accounting, sales, purchasing, inventory, and customer interactions to get an end-to-end view of your business. Chart financial performance in real time with built-in Power BI dashboards.

Accelerate financial close and reporting

Streamline accounts receivables and payables, and automatically reconcile accounts to close and report on financials quickly and accurately, while maintaining compliance.

Improve forecast accuracy

Refine financial forecasts by modeling and analyzing data across multiple dimensions. Customize reports using seamless Microsoft Excel integration.

Automate and secure your supply chain

Optimize inventory levels

Use built-in intelligence to predict when and what to replenish. Purchase only what you need with dynamically updated inventory levels.

Avoid lost sales and reduce shortages

Maintain the right amount of inventory by automatically calculating stock levels, lead times, and reorder points. Suggest substitutes when requested items are out of stock.

Maximize profitability

Get recommendations on when to pay vendors to use vendor discounts or avoid overdue penalties. Prevent unnecessary or fraudulent purchases through approval workflows.

The screenshot displays a software interface for supply chain management. It features a grid of product cards, a forecast chart, and a detailed inventory table.

Sell smarter and improve customer service

Deliver value at every touch point

Prioritize sales leads based on revenue potential. Keep track of all customer interactions and get guidance on best upsell, cross-sell, and renewal opportunities throughout your sales cycle.

Boost sales productivity

Accelerate the quote to cash process. Act quickly on sales-related inquiries, manage service requests, and process payments—all from within Outlook.

Deliver exceptional service

Gain a comprehensive overview of your service tasks, workloads, and employee skills to effectively assign resources and accelerate case resolution.

Keep projects on time and under budget

Stay on budget

Create, manage, and track customer projects using timesheets along with advanced job costing and reporting capabilities. Develop, modify, and control budgets to ensure project profitability.

Plan with precision

Manage resource levels by planning capacity and sales. Track invoicing for customers against planned costs on orders and quotes.

Analyze project performance

Make effective decisions with real-time insight on project status, profitability, and resource-usage metrics.

The image shows a software interface for managing employees and job details. The main window is titled "VIEW - EMPLOYEE LIST + New" and displays a grid of employee profiles. Each profile includes a profile picture, name, and job title. A sidebar on the right, titled "Job Details", provides a breakdown of costs and prices for a specific job (JOB00020).

Optimize your operations

Manage forecasting to fulfillment

Use sales forecasts and expected stock-outs to automatically generate production plans and create purchase orders.

Run your warehousing efficiently

Get a holistic view of inventory for efficient order fulfilment. Track every item transaction and movement by setting up bins based on warehouse layout and storage unit dimensions.

Reach optimal output levels

Calculate and optimize manufacturing capacity and resources to improve production schedules and meet customer demands.

The screenshot displays the SAP WMS interface for a new warehouse shipment (SH000005). The main window shows general information such as location code (WHITE), zone code (SHIP), and bin code (W-09-0001). A pop-up window titled 'EDIT - ITEM AVAILABILITY BY BOM LEVEL' is open, showing a detailed table of components and their availability.
